Synopsis

This is the eBook of the printed book and may not include any media, website access codes, or print supplements that may come packaged with the bound book. Now significantly expanded and fully updated, IN FORMATION TECHNOLOGY FOR THE HEALTH PROFESSIONS, 4/e Â is the ideal information technology primer for readers working in any healthcare field, including allied health, nursing, medical/dental/pharmaceutical assisting, or medical administration. It fully addresses each key issue in contemporary healthcare IT, including the accelerating migration towards electronic health records. New coverage includes: smartphones, tablets, and their healthcare applications; the role of healthcare reform in promoting health IT; EHR meaningful use criteria; new practice management scheduling software; the growth of telemedicine; new problems in public health; interventional radiology; surgery-related nanotechnology; information-related biotech and pharmaceutical trends; expanded applications in psychiatry and rehabilitation; genetic privacy; and much more.

Customer Reviews

Gives a broad overview. My professor chose this as it was 200+ pages over the previous textbook that was 600+ pages.The chapters are usually less than 20 pages each, quick to read, and it is pretty current.

I purchased this book for a college class and so far I like the book it's thin, the chapters are of a short but decent length. The first chapter if you already know a lot about computers is kind of boring, but other than that great book. Book arrived in better condition than expected.

Needed this book for fall 2015 semester health technology class and there was no issues. I rented it and all pages were in tact, no highlighting, or writing in the book. Definitely recommend.

This was required for my computers in medicine class. Most of the information needed to know I got out of this book alone. Pretty helpful, but not interesting thus far

this book was worthless. very general information. If i needed that I could use Google.

Very informative book. Easy read. Enjoyed the class!

Received in very good condition. thank you.

A++++ THANKS FOR SHIPPING SO QUICK!
