Cardiovascular Nursing Practice: A Comprehensive Resource Manual And Study Guide For Clinical Nurses

Synopsis

This book is primarily for clinical cardiac nurses working with patients in all types of clinical settings: intensive care, telemetry units, step-down units, emergency departments, chest pain centers, cardiac and interventional radiology laboratories, physician offices and clinics, and in home health care. It is a useful resource for students and educators in hospitals as well as schools of nursing, and for clinical nurse specialists who are responsible for teaching and supporting clinical nursing staff

Customer Reviews

I purchased this book through the AACN at a Critical Care Conference to help me prepare for a cardiovascular certification I am working towards. I work as an RN on a progressive/step-down cardiac unit. This is the best nursing reference book I own! I find this (huge) book well organized, comprehensive, easy to understand and interesting to read. Most of the other books I have been using to study read like boring textbooks, however this book is outstanding. I HIGHLY recommend this book to any nurse who is interested in cardiovascular nursing, regardless of whether or not you are working towards a certification.

The book was worn with writing and highlighting in it and it reaked of smoke.
