Core Curriculum For Critical Care Nursing, 6e

Synopsis

From the experts at the American Association of Critical-Care Nurses (AACN), comes the definitive resource on administering quality nursing care to critically ill patients. The 6th edition has been updated to reflect the current state of critical care nursing practice and includes new content on the AACN Synergy Model, professional care and ethical practice, and critical care patients with special needs, as well as the most current literature and clinical studies. The clear and logical format makes this book an ideal study tool for critical care nursing orientation and continuing education programs. By covering the newest content on the CCRN exam, it also serves as an important resource for nurses preparing for critical care certification. Authored by the experts at the American Association of Critical-Care Nurses. Reflects the most recent blueprint of the CCRN examination. Content spans basic to advanced levels with an emphasis on nursing practice. Organized by body system and written in a concise outline format for ease of use. Coverage of the AACN Synergy Model is featured in the new opening chapter. Professional Care and Ethical Practice is integrated into the Core Curriculum series framework. A new chapter on Critical Care Patients with Special Needs includes bariatric and geriatric patients in critical care, as well as high-risk obstetric patients. Features new content on chest tubes, liver transplantation for acute liver failure, spirituality, and spiritual aspects of care. Integrates pain as the 5th vital sign and includes JCAHO, HCFA, and AHCPH guidelines relating to pain management. Features AHRQ evidence-based practice guidelines as reference sources for practice interventions. New organization for Patient Care presents patient problems, needs, etc. in order of clinical priority. Expanded Nursing Interventions includes considerations related to patient/family education, patient transfer, and discharge planning. Web-based resources for CDC, AHA, NINR, National Guideline Clearinghouse, NIH Consensus Conference Proceedings, ADA.

Customer Reviews

Presented in outline form, this is a well organized and well documented volume. It works well with its "side-kick" volume of practice question sets for the CCRN certification exam.

the organization of this text is very helpful, easy to find what i'm looking for without too many words. great for jogging my memory when i'm busy and want to remember something i haven't worked with in a long time.

This book really has an answer for everything. It has helped me on almost every homework assignment I have ever had for my bachelors degree in nursing.

Great book to have as a resource. It stays in my work bag because It has so many great information. This book will help you become a great critical care nurse because it tells you what to expect base on your patient's diagnosis. Great resource.

The book is a great review, but be prepared to stare at wordy outlines & it is rare to find a picture or diagram. The book has been recommended to me by several CNS's so I will continue to try & read it, but its not as exciting as a Laura Gasparis DVD, that's for sure!

This book is a wonderful tool to created to help nurses freshen up on the many different systems or even prepare one for the CCRN test.

Bought it to study for the CCRN exam, but glad I will have it on the shelf for years to come any day I have a patient with some pathology or monitoring parameter that I'm not familiar with.

This book has a lot of helpful information that will definitely help you to pass the exam. I did. Good luck!!!
