# Human Development (9th Edition)

## Synopsis

Drawing from many disciplines to provide an up-to-date presentation of the key questions, topics and controversies in life span development, this book takes a chronological approach to human development. It focuses on context and culture while illustrating that the status of human development is inextricably embedded in a study of complex and changing cultures. Maintaining an open-ended perspective throughout, the volume encompasses many different and opposing views and encourages readers to develop an informed point of view. This volume presents perspectives and research methods and examines approaches to understanding human development, heredity and environment. It reviews the physical, cognitive, and language development, as well as personality development and sociocultural development in infancy, toddlerhood, early and middle childhood, adolescence, young adulthood, middle adulthood and older adulthood. For those interested in human physical, cognitive and sociocultural development.

## Book Information

Hardcover: 736 pages

## Customer Reviews

Human Development is an excellent textbook, and one of the best textbooks I have ever used in my studies in Psychology. The author has laid out the chapters in chronological order from infancy to old age. Theories of development are clearly explained and charted. Many true-life examples of research and studies are scattered throughout the text, making theoretical material easy to comprehend. I would highly recommend this textbook to any instructor who is in search of high quality up-to-date material.

I used the eighth edition of this book for my graduate level course in human development. It is an excellent resource for anyone involved in child-related fields.

I would recommend this book to anyone who is doing a course in education or psychology. I received it in good condition and it was helpful with a 3000 word essay I had to write. Lovely cost as well.
