My daughter struggles with phonetics, we've been doing something similar on our own at home and I just kept getting stumped on what to draw for some words. This is super handy, we copy the word onto the white board and practice writing and spelling it while she looks at the image.. The images are simple yet very effective and accurate, especially on the small words I had a really hard time trying to come up with a picture for!

Good dictionary with pictorial images of words for children to form associations. Everything is readable and I think this dictionary is a better bargain than buying different stacks of cards, which I understand are more expensive. We keep this Dictionary in the car so that our daughter can browse through it during driving times.

I found this resource provides an effective alternative way to teach sight words that works well for all students, but especially low progress readers who struggle with learning and applying these words to their reading and writing. The picture-cues attached to the sight words, action and sentence/story context make them so much more memorable for students than the usual practice exercises. They actually enjoy learning this way and motivation is so important. I also use the sight word cards for lessons and the word wall that are in this series from Child-1st Publications. Students can also use the picture-cued examples as a model for making their own word banks.
