Change your life and your diet today with easy to make meals and snacks, and start to see results in literal DAYS! Say "Goodbye" to the common cold, inflammation, and even everyday pains you may have. The anti-inflammatory diet doesn't have a catchy name like most of the other diets out on the market. It doesn't promise that you'll lose 10 pounds in 10 days. More than a diet, it's a life-long eating plan. It has become clear that long term inflammation is the main cause for many serious illness. Everyone knows the signs of inflammation on the skin; local redness, heat, swelling and pain. It shows that the body is working to repair itself by bringing more blood (nourishment) and immune activity to the site of infection or injury. However, when that inflammation hangs on or occurs where no injury or infection is located, it can damage the tissues and cause illness. Supporters of this diet believe that it can reduce the risk of heart disease as well as keeping current heart problems from worsening. It can reduce the level of triglycerides in the blood, blood pressure and ease the symptoms of arthritis. Following this diet can also make losing weight easier, and even has the potential to slow down the aging process as well. Take the time to better yourself and buy this book!
