# Fascinomas - Fascinating Medical Mysteries

## Synopsis

Fascinomas â€”fascinating medical mysteries. A paralyzed teen recovers overnight. A woman complains her breast implants speak. A man and his dog become gravely ill at the exact same time. These strange real-life cases and many more can be found in author and physician Clifton K. Meadorâ€™s newest collection, *Fascinomas*. Combining the word â€œfascinatingâ€• with the term for a tumor or growth, â€œfascinomaâ€• is medical slang for an unusually interesting medical case. These are the extraordinary stories medical professionals recall forever and pass from one colleague to another in hospital lounges and hallways. Every medical professional has at least one fascinoma to tell, and in this collection of bizarre-but-true stories, Meador retells some of the most memorable. In the vein of Berton Roueché©, the famed medical writer for *The New Yorker*, the author of *True Medical Detective Stories* is back with an all-new book of complex cases, where medical professionals must often race against the clock to find clues in the most unusual places. *Fascinomas* is an entertaining and informative collection for physicians, nurses, medical students and those who simply canâ€™t get enough of bizarre clinical cases. Written from the point of view of an experienced doctor, the stories are crafted in an engaging style that can be enjoyed by medical professionals and laypeople alike. More than just interesting tales, however, these real-life mysteries serve as great examples of the need for doctors to listen closely to and ask the right questions of their patients, even in the computer age, when so much information is at their fingertips. Sometimes the truth is stranger than fiction, and you never know where a crucial piece of evidence will be found by one of the detectives of the medical world.

## Customer Reviews

Clifton K. Meador, MD has a gift for filtering through tales and “can you beat this one” stories that are passed around doctors’ lounges and ORs and coming up with succinct but extremely entertaining stories. A “Fascinoma”, as Meador defines, is medical slang for an unusually interesting medical case. He has gleaned and collected and curated 35 such cases from his own experience and the experiences of colleagues who have given permission to re-tell their own blockbusters. Each case is reads like a short story “ the presentation of a strange set of symptoms, the initial response of the examining doctor(s), gradual revelation of further symptoms (sometimes via revealed secrets from the presenting patient), and the final diagnosis. Fellow Physicians will find both hilarious entertainment along with some “aHa!” moments that will sharpen their diagnostic acumen. For the general reader this book is not only entertaining but very informative about many aspects of the practice of medicine that should prove fascinating in the realm of Ripley’s Believe it or Not!
