# EGFR Signaling Networks In Cancer Therapy (Cancer Drug Discovery And Development)

## Synopsis

The epidermal growth factor (EGF) receptor and its downstream signal transduction networks have been implicated in the ontology and maintenance of tumor tissues, which has motivated the discovery and development of molecularly targeted anti-EGF receptor therapies. Over decades of study, the EGF receptor structure, its ligand binding domains, the physical biochemistry underlying its intrinsic tyrosine kinase catalytic function and the modular interactions with SH2, PTB, and SH3 domain containing signaling adaptor proteins required for signal transduction, have been extensively dissected. Not only is the EGF receptor the nexus of many streams of information, but it also forms one part of a calculating device by forming dimers and oligomers with the other three receptors in its family in response to at least eleven ligands (some of which are expressed in multiple forms with overlapping or quite distinct functions). This phenomenon, while recruiting to the inner surface of the cell membrane and activating multiple second messenger proteins, also allows the possibility of cross talk between these systems, permitting a further layer of information to be exchanged. Less well described are the cross regulation of the EGF receptor and other anti-apoptotic, mitogenic and metabolic signaling systems. The study of these systems has yielded new surprises. One hurdle in these efforts has been that signal transduction pathways have frequently been defined in the generic absence of their tissue-specific or cell-interaction specific context.

## Book Information

File Size: 25491 KB

Print Length: 406 pages

Page Numbers Source ISBN: 1588299481

Publisher: Humana Press; 2009 edition (March 1, 2009)

Publication Date: March 1, 2009

Sold by: Amazon Digital Services LLC

Language: English

ASIN: B00A9YFX4A

Text-to-Speech: Enabled

X-Ray: Not Enabled

Word Wise: Not Enabled

Lending: Not Enabled

Enhanced Typesetting: Not Enabled

Best Sellers Rank: #2,395,843 Paid in Kindle Store (See Top 100 Paid in Kindle Store) #27

inÂ Books > Medical Books > Pharmacology > Molecular #158 inÂ Kindle Store > Kindle eBooks > Medical eBooks > Internal Medicine > Oncology > Chemotherapy #2751 inÂ Books > Medical Books > Basic Sciences > Cell Biology

## Customer Reviews

Ales great
