How Do You Kill 11 Million People?: Why The Truth Matters More Than You Think

Synopsis

How Do You Kill 11 Million People? Or, to be precise, 11,283,000 people. Andy Andrews believes that good answers come only from asking the right questions. Through the powerful, provocative question, "How do you kill eleven million people?" the number of people killed by the Nazi German regime between 1933 and 1945 he explores a number of other questions relevant to our lives today: Does it matter that millions of ordinary citizens have checked out of participating in the decisions that shape the future of our country? Which is more dangerous: politicians with ill intent, or the too-trusting population that allows such people to lead them? How are we supposed to tell the difference between the "good guys" and the "bad guys"? How does the answer to this question affect not only our country but our families, our faith, and our values? What happens to a society in which truth is absent? Andrews issues a wake-up call: become informed, passionate citizens who demand honesty and integrity from our leaders, or suffer the consequences of our own ignorance and apathy. Furthermore, we can no longer measure a leader's worth by the yardsticks provided by the left or the right. Instead, we must use an unchanging standard: the pure, unvarnished truth.

I have read well over 1000 books over the past 10 years. And out of all those books, there are probably about 20 to 30 of them that I could honestly say were paradigm-shifting, life-altering in their

implications and/or profound in their application. This book is now in my Top 20. Let's begin with 2 facts: 1. The book is short. It will probably take you an hour to read from cover to cover. The "meat" of the book only takes up the first 47 pages. The remainder is a candid interview with the author, a reading guide, and a bibliography. Believe when I say that the "shortness" of the book doesn't diminish its value in the slightest. Those 47 pages are Gold, not just because of what the author wrote (You, me and everyone else could stay up all night, every night for a week and not think of half the stuff this guy comes up with), but for the questions, ideas, and implications he leaves the reader with that he didn't have to write down. 2. Andy Andrews is known best for his "Fiction with a Moral" approach. This is not one of those books. It isn't warm and fuzzy. It won't make you feel giddy when you finish it. It's Nonfiction, non-religious, non-partisan and borderline unclassifiable. The only way I know how to put it is by analogy: Two speakers of antiquity, Cicero and Demosthenes. It was said of Cicero that when he would finish speaking, everyone would agree that he had given a well-worded, finely-crafted speech. It was said of Demosthenes that when he would finish speaking, the people stood and said "Let Us March!". This book is more Demosthenes than Cicero. Just like every other book this author has written, it is neither a call to emotion nor intention. It's a call to Action. It's a call to Honesty, first and foremost with ourselves.
