When Healing Becomes A Crime: The Amazing Story Of The Hoxsey Cancer Clinics And The Return Of Alternative Therapies

Synopsis

A powerful and substantiated expose of the medical politics that prevents promising alternative cancer therapies from being implemented in the United States. • Focuses on Harry Hoxsey, the subject of the author's award-winning documentary, who claimed to cure cancer using herbal remedies. • Presents scientific evidence supporting Hoxsey's cancer-fighting claims. • Published to coincide with the anticipated 2000 public release of the government-sponsored report finding "noteworthy cases of survival" among Hoxsey patients. Harry Hoxsey claimed to cure cancer using herbal remedies, and thousands of patients swore that he healed them. His Texas clinic became the world's largest privately owned cancer center with branches in seventeen states, and the value of its therapeutic treatments was upheld by two federal courts. Even his arch-nemesis, the AMA, admitted his treatment was effective against some forms of cancer. But the medical establishment refused an investigation, branding Hoxsey the worst cancer quack of the century and forcing his clinic to Tijuana, Mexico, where it continues to claim very high success rates. Modern laboratory tests have confirmed the anticancer properties of Hoxsey's herbs, and a federal government-sponsored report is now calling for a major reconsideration of the Hoxsey therapy. *When Healing Becomes a Crime* exposes the overall failure of the War on Cancer, while revealing how yesterday's "unorthodox" treatments are emerging as tomorrow's medicine. It probes other promising unconventional cancer treatments that have also been condemned without investigation, delving deeply into the corrosive medical politics and powerful economic forces behind this suppression. As alternative medicine finally regains its rightful place in mainstream practice, this compelling book will not only forever change the way you see medicine, but could also save your life.

Book Information

Paperback: 480 pages

Publisher: Healing Arts Press; Original ed. edition (May 1, 2000)

Language: English

ISBN-10: 0892819251

ISBN-13: 978-0892819256

Customer Reviews

Warning, when you read this book you might be scared away from "conventional medicine"! If you are suffering of cancer or have a relative that is terminally ill and has been given up by doctors, I recommend this book as a "second opinion". This book tells the story of how an alternative treatment was sabotaged by the medical community and by organizations that are supposed to protect our health (such as the Food and Drug Administration). As a European, I have been quite skeptical about this agency for some time, and this book doesn't help at all! The picture this book gives you is that the main reason a drug gets accepted or not might be linked to serious lobbying inside the conventional medical community and to the financial gains that are linked to it. This isn't hard to believe if you see how the tobacco lobby succeeded for years to cover up the problems smoking causes. Yet, there is hope as far "conventional medicine" is concerned. Evidence Based Medicine (EBM) teaches doctors that they should stay current with recent research on drugs and learn how to interpret studies before administering drugs to their patients. I studied this subject in preparation of my Ph.D. I believe that EBM practices do drastically enhance our chances as patients to get the right treatment, especially if you read that 50% of doctors risk giving you a wrong or outdated treatment. No wonder many doctors admit that many patients get better DESPITE their doctor's treatment. The problem with EBM is that apparently some often used treatments such as many current forms of chemotherapy lack the statistical data to back them up, and that doctors seem to treat patients with those cures because they don't have anything better.

WHEN HEALING BECOMES A CRIME, Kenny Ausubel, Rochester, VT: Healing Arts Press, 2000, 461pp., \$19.95 Despite being involved in alternative medicine (specifically homeopathic medicine) since 1972, I have always had strong skepticism of alternative therapies for cancer. I questioned their true effectiveness, and even more, I questioned the ethics of their advocates. After reading Kenny Ausubel's newest book, I realize now how effective the propaganda against alternative cancer therapies have been on me, despite my own predilections towards alternative medicine and my strong skepticism of conventional approaches. I was truly blown away by WHEN HEALING BECOMES A CRIME. What the SILENT SPRING did for the environmental movement, his book does for the alternative cancer movement (perhaps this book should have been called or sub-titled THE SUPPRESSED SPRING, since the AMA, the FDA, and the drug companies have been so

effective in suppressing any positive information about these therapies and have been extraordinarily effective in providing misinformation about them). The general public is interested in alternative medicine, not only in recent times, but Ausubel references a Chicago Medical Society survey that discovered that 85% of Americans used "drugless healers" in the early 1940s. The misinformation and demonization of alternative medicine by the AMA and the FDA is quite remarkable and sad (no, St. Johns wort won't cure this depression!).

Kenny Ausubel spent 20 years of the prime of his life researching a story that everyone needs to know. Paragraph by paragraph, he reveals the motivations of those who would deprive suffering patients of history's most successful cancer treatment. Personally, I have never been able to take Hoxsey the man seriously, but what erudition Hoxsey lacked, Dr. Frederic Mohs had in abundance -- and what is extraordinary is that their bloodroot paste formulae were essentially identical. Hoxsey was persecuted for his efforts to make his treatment available; the Mohs microsurgery method is now widely accepted and practiced in such illustrious institutions as Harvard Medical School. Ergo, the pattern of suppression detailed in Ausubel's book is all the more important because it was not based on science but rather on the politics of medicine, something that demands questioning since fifty years later, the basic problem is not solved. There is no question but that the public deserves access to anything that might alleviate suffering, prolong lives, or cure them of their illnesses. The Government is charged with protecting the public from fraud; but in its zeal to brand outsiders as quacks, it has lost focus on the humanitarian as well as clinical aspects of healing. I therefore disagree vehemently with the review posted below by fraud investigator. Hoxsey made his money in oil and operated affordable facilities for people seeking a cure for cancer. Yes, he was lacking proper credentials, but knowledge and experience can be acquired in clinical settings where keenly observant people can by-pass indoctrination and determine whether or not patients are responding well to treatment.
