Shipping Weight: 3.3 pounds (View shipping rates and policies)

Average Customer Review: 4.0 out of 5 stars Â See all reviews (4 customer reviews)

Best Sellers Rank: #1,186,702 in Books (See Top 100 in Books)  #57 in Books > Medical Books > Pharmacology > Clinical  #839 in Books > Textbooks > Medicine & Health Sciences > Allied Health Services > Pharmacy  #844 in Books > Textbooks > Medicine & Health Sciences > Allied Health Services > Medical Assistants

**Customer Reviews**

This is a great resource for learning how to make informed decisions about which drugs are right for your clients based on their individual medical history. If you are looking for a book that will teach you about drug dosing, this is NOT the book for you. It IS designed to teach mechanism of action, pharmacokinetricks, adverse reactions, etc, of drugs based on their classification. The only drawback I found was that from chapter to chapter there were so many different authors, that there was an inconsistency in the writing and teaching styles. Some chapters were well written for my level of education (I am a nurse practitioner student), while others were talking well above my head. Most of us in NP school took our chemistry classes many years ago, so those authors who delve deep into the chemical level of drugs needed to clarify and simplify some of their teachings. Otherwise, this is a great teaching tool.
I love this textbook and I have used it as a faculty member for many years. I wish it was used more often. The figures are especially terrific!

It's a bit beat up but I want it for its content.

This book is way too in depth for anyone getting pharmacology crammed down their throat. I'm sorry your school made you buy this. You will probably never use it.
