When I first flipped through this book, a few entries caught my eye. ("Glacier"? Really?) I wondered why Fogarty had included them in a list of words of importance for high school grads. Then I read it. Now I get it. (Yes, "glacier." Really.) The words in this book aren't necessarily ones that high school grads will know if they did their homework. I've seen similar lists for high school grads, and they usually include boring stuff like "hypothesis" that grads should know when they get a diploma. This one's different. If incoming college students knows these words, they'll be a step ahead in cultural

literacy and understanding the world around them, whether it's the news, politics and what the politicians are saying (or calling each other), technology (important in today's world), science (ditto), or even pop culture. The book has a fun tone. It's a quick and easy read with lots of white space (easy on the eyes) and humorous drawings. The words are alphabetical, and every letter of the alphabet gets at least one. A few of my favorites: galaxy (New etymology for me.) ironic (Please, please, people! Learn this one and use it correctly.) epic (And not just as "epic fail.") mandate (I love how its got a history that's the reverse of verbification of nouns.) canard (New word for me.) ad hominem (A must-know for election years.) Romance languages (Before, I could have told you what they are, but I didn't know why until now.) ubiquitous (I love a good word joke, and you'll find one here.) The explanations are easy to understand, and each word gets a quotation to show how it's used. I really enjoyed these; they're totally entertaining.
