Colorado Atlas And Gazetteer

Synopsis

Wouldn't it be nice to always have exactly the right kind of map, whatever your needs may be? You will, with the uniquely versatile DeLorme Atlas & Gazetteer Series. These topographic atlases cover individual states with the most comprehensive detail available, including back roads, backwater lakes and streams, boat ramps, forests, wetlands, trailheads, campgrounds, public lands, prime hunting and fishing spots, and countless landmarks and points of interest. You'll also find a wealth of information on everything from family outings to wilderness adventures. The Atlas & Gazetteer is ideal for outdoor recreation, business travel, home or office reference, and countless other uses.

Book Information

Paperback: 104 pages

Publisher: DeLorme Publishing (2000)

Language: English

ISBN-13: 978-0975937402

ASIN: 0899332889

Product Dimensions: 15.3 x 10.7 x 0.3 inches

Shipping Weight: 1.2 pounds

Average Customer Review: 4.5 out of 5 stars [See all reviews](#) (100 customer reviews)

Best Sellers Rank: #67,244 in Books (See Top 100 in Books) #70 in [Books > Reference > Atlases & Maps > Atlases & Gazetteers](#) #103 in [Books > Travel > United States > West > Mountain](#) #133 in [Books > Reference > Atlases & Maps > United States](#)

Customer Reviews

Having just purchased my fourth edition of the DeLorme Colorado Atlas & Gazetteer, I immediately noticed several differences from past editions, all of which make this product an inferior "update" to what had been my mainstay map book for recreation here in Colorado. First (and worst), the current edition of DeLorme for Colorado does not show all of the public campgrounds -- or even a respectable fraction of them. These are the ubiquitous US Forest Service campgrounds that are sprinkled throughout Colorado's ten national forests, and are a handy (though primitive) camping alternative for hundreds of thousands of residents and visitors each year. Past editions of the Colorado Atlas and Gazetteer showed each and every USFS public campground, which meant that all the info I needed short of consulting a USFS National Forest-specific map was in one place: DeLorme. Now, however, the DeLorme map book shows maybe one out of every three or four --

which probably is worse than showing none at all. It is not omitting ALL USFS campgrounds; it is woefully INACCURATE in what it does show. This from an "atlas"?Second, the new map book has so exaggerated the width of roads and over-emphasized place names that it looks like a cartoon of its former self. It is more difficult to read, and is almost deceptive in its scale of road size to the scale of the actual map. Further, by exaggerating road widths, it now has to sacrifice detail and accuracy anywhere neighborhoods appear, particularly in mountain areas. So, again, it is no longer adequate as my only map source when traveling to those areas.Third, the "new and not improved" DeLorme has made the blue lines and lettering of stream and lake names even more difficult to read than before (and they were elusive in past editions).
