Course Experience
for Every Student

Wolters Kluwer

Synopsis

Lippincott CoursePoint is the only integrated digital curriculum solution for nursing education. CoursePoint provides a completely integrated and adaptive experience, all geared to help students understand, retain, and apply their course knowledge and be prepared for practice. CoursePoint is structured in the way that students study, providing them the content exactly where and when they need it for a more effective learning experience. The powerful integration of adaptive learning, powered by prepU, with the premium digital course content provides a personalized learning experience that drives students to immediate remediation in their course content and allowing instructors and students assess their progress in real-time. The digital textbook is downloadable, so students will have perpetual access to this content. 978-1-4698-7325-1 Karch Lippincott CoursePoint for Focus on Nursing Pharmacology 6e (includes integrated access to the ebook and adaptive learning, powered by prepU) Amy Karch has found that students learn best when concepts are built upon each other, growing from simple to complex, building on a foundation of understanding. Organized by body systems, this heavily illustrated text organizes essential nursing pharmacology information into focused, easy-to-learn steps. Building key concepts upon each other, the text gives students a solid foundation of understanding. Easy to understand drug prototype boxes are integrated throughout the text as well as integrated content summaries. Contains more images depicting drug actions than any of the text's competitors. Includes the popular and proven "Focus on" theme for drug use across the lifespan, cultural and gender considerations, evidence-based practice, patient teaching, herbal and alternative therapies and dosage calculation; including "Focus on Safe Medication Administration;" and a "Drugs in Focus" table for each classification of drugs. Focused content and focused features equal a focused student. Drug discussions include therapeutic actions and indications, pharmacokinetics, contraindications and cautions and adverse effects. Detailed rationales are presented throughout. Each chapter opens with Learning Objectives and a Glossary of Key Terms, and ends with NCLEX-style questions, and contains a case study-based critical thinking exercise that sets up a situation, shows critical thinking, and then presents a discussion and case-based nursing care guide. Features like this make the text an essential teaching tool! Online Tutoring powered by Smarthinking Free online tutoring, powered by Smarthinking, gives students access to expert nursing and allied health science educators whose mission, like yours, is to achieve success. Students can access live tutoring support, critiques of written work, and other valuable tools.

Customer Reviews

This product was fine, however you should be aware that this subscription does not come with the vsim. If you need that for your course you will need to buy coursepoint+

Well written pharmacology textbook. Easy to read and very helpful for the future Nurse!

Great product
