# Super Nature Encyclopedia

## Synopsis

How can a cheetah accelerate from zero to forty miles per hour in three seconds? How do termites build cooling systems into their homes? What is that Alien-like set of jaws in a moray eel's mouth for? These questions and more are explored in *Super Nature Encyclopedia*, an interactive look at the "wow" factor of the natural world — spotlighting Great White Sharks, African Elephants, Emperor Moths, Howler Monkeys and more of the world's most fascinating and surprising animals in remarkable detail. Visualized with incredible 3D animal models with cross-sections and strip layers, readers can explore every essential detail of the animals' anatomical features and learn why their bodies work the way they do. Supports the Common Core State Standards.

## Book Information

Lexile Measure: IG1140L (What's this?)

Hardcover: 256 pages

Publisher: DK Children (September 17, 2012)

Language: English

ISBN-10: 075669793X

ISBN-13: 978-0756697938

Product Dimensions: 10.1 x 0.9 x 12.1 inches

Shipping Weight: 3.6 pounds (View shipping rates and policies)

Average Customer Review: 4.9 out of 5 stars — See all reviews — (30 customer reviews)

Encyclopedias & Subject Guides > Veterinary #3312 in Books > Children's Books > Animals

Age Range: 8 - 12 years

Grade Level: 3 - 7

## Customer Reviews

Something they want  
Something they need  
Something to wear  
Something to read  
This is a wonderful way of covering Christmas don't you think. I saw it on Pinterest recently and trust me that I love the idea of reducing the quantities of things under the Christmas tree. One thing I always done was to give books to the kids at any age they were. This year, I am planning to give this marvelous book to my son who adores animals. He has a special gift with all creatures and I think he will enjoy this book very much. The book will present to you a variety of animals from the various species existing on earth - mammals, birds, reptiles, amphibians, fish, and invertebrates. In each section you will discover the ones who will have the most amazing anatomy, the animal athletes, the life stories of

some animals as well as the supernatural senses they might have. Each section will also highlights the record-breakers that exist around the planet. Each animal has a stats and facts that will give you interesting information about is, an at a glance section which will highlights the size, habitat, location and diet of the animal as well as close up photos of it. Depending of the animal presented, you could also get some 3D animal models or drawing that will help you understand a specific aspect of the creature. For example, take the woodpecker - a bird that is commonly seen everywhere during the summer. Even when you don't see it, you can hear his tock-tock-tock as he is looking for food in the tree. Did you know that a woodpecker's skull is made of spongy bone that absorbs the vibrations has he makes holes? The brain sits very tightly inside the skull to stop it from bouncing off the bone when the bill strikes.
