Customer Reviews

I found Nursing Assistant/Nurse Aide Exam book to be a very comprehensive tool for review/practice. At the beginning of the book are tips for taking an exam. Each of the practice exams seems to be a little more difficult than the previous one. The last section of the book has what is called exam question outline. It classifies the questions for each individual exam into topics - physical care skills, psychosocial care skills and role of the nurse aide. The student can circle the incorrectly answered questions and see pretty clearly where she/he needs more review. I tutor students in an English as a Second Language program and used this book with a student who took a nurse aide course but has been unable to pass the exam. Being able to pinpoint where to focus our study time has been very helpful. In the answer section after each exam is an explanation of the correct answer and why the others are incorrect. I found this to be a very useful book

A friend of mine failed the first time she took the state boards, but with this book, she passed it easily. Not only does this book have test and answer, but it also explains the wrong and right answers to each question. I'd recommend using this book while your taking the class, so you can have better understanding of what is discussed in class.

I teach the CNA class. I used this for the review before my students took their state boards today. I don't know if they passed yet, but all of them said the actual exam was much easier that the ones in this book...Great...just what I wanted. ...very helpful review tool..thanks

This is a great reviewer for taking the CNA test in California. This is what one of our teachers recommended for our class to use. Has test samples so I have a better idea on what to expect come exam day.

I passed my text thnx 2this book

I wanted to become a CNA after my first semester of nursing school. The sample tests in this book were exactly like the ones on my CNA exam. I had a paper 100 question exam, and the state requires 85% to pass. The testing center does not give out actual scores, but the proctor told me my score was fantastic. I honestly felt like I got 100%. Highly recommend.

Very much like the real exams ~ a good foretaste. Used it to cram for the exam after it had been quite a while since my training course.

Because that book helped me pass both the written and skills exam, and I recommend the book to allow CNA student who will be taking their state board exam thx.
