Pharmacology And Physiology In Anesthetic Practice

Synopsis

Dr. Stoelting's best-selling and highly acclaimed text, *Pharmacology and Physiology in Anesthetic Practice*, is now in its thoroughly updated Fourth Edition. In 60 concise, clearly written chapters, this book provides comprehensive, current, clinically oriented, authoritative information on all aspects of pharmacology and physiology that are relevant to perioperative patient management. This edition includes all new drugs and new findings on actions and interactions of established drugs. More than 400 diagrams and more than 100 tables complement the text. This edition's new two-color page design will help readers spot key information. A separate drug index is included for quick reference. Subscribe to Lippincott's Interactive Anesthesia Library and get online access to the fully searchable content of eight critically acclaimed references in anesthesiology, critical care, and pain management.

Book Information

Hardcover: 850 pages

Publisher: LWW; Fourth edition (October 3, 2005)

Language: English

ISBN-10: 0781754690

ISBN-13: 978-0781754699

Product Dimensions: 11.3 x 8.6 x 1.4 inches

Shipping Weight: 4.2 pounds

Average Customer Review: 3.7 out of 5 stars [See all reviews](#) (15 customer reviews)

Best Sellers Rank: #388,833 in Books (See Top 100 in Books) #6 in [Books > Medical Books >](#)

[Pharmacology > Pharmacodynamics](#) #28 in [Books > Textbooks > Medicine & Health Sciences >](#)

[Nursing > Clinical > Anesthesia](#) #45 in [Books > Medical Books > Nursing > Anesthesia](#)

Customer Reviews

For anyone attempt an anaesthetic primary examination, Stoelting is a mandatory resource for pharmacology. It is an unfortunate reality that all pharmacology texts disagree with one another in subtle and not-so-subtle ways. At least in Australia, Stoelting is taken to be the examination reference. It also thus plays the role of a de facto syllabus: material in Stoelting is much more likely to be examined, and material not covered in Stoelting less so. For this reason, it is indispensable for exam candidates and I would strongly advocate having your own copy. In the end, it is a worthwhile investment given the amount of flesh you already have on the line. However, I offer two significant points of caution: (a) DO NOT buy the "mini" Stoelting (*Handbook of Pharmacology and Physiology*

in Anesthetic Practice). It does not have the detailed information required for the exam. I started with the "mini" Handbook but, thankfully, realised that it was not up to par and bought the full text in time to prepare.(b) IGNORE the physiology section of the text. It is useless. I think of Stoelting exclusively as a pharmacology text, and seek better resources for physiology (Brandis' excellent private publication "The Physiology Viva"... do an Internet search for it;
