Pharmaceutical Analysis: A Textbook For Pharmacy Students And Pharmaceutical Chemists

Synopsis

An introductory text, written with the needs of the student in mind, which explains all the most important techniques used in the analysis of pharmaceuticals - a key procedure in ensuring the quality of drugs. The text is enhanced throughout with keypoints and self-assessment boxes, to aid student learning. Features Includes worked calculations to demonstrate mathematics in use for pharmaceutical analysis. Focuses on key points rather than a large number of facts to help readers really understand the field as well as pass exams. Includes self-assessment, focussing on simple arithmetical calculation results from analytical data. Additional section on basic calculations in pharmaceutical analysis More detail on the capillary electrophoresis of proteins A discussion of some of the new types of HPLC column and on solvent selectivity in HPLC Additional material inserted on the control of the quality of analytical methods, mass spectrometry and high pressure liquid chromatography Additional self-assessment exercises

Book Information

File Size: 9514 KB

Print Length: 440 pages

Simultaneous Device Usage: Up to 4 simultaneous devices, per publisher limits

Publisher: Churchill Livingstone; 3 edition (July 15, 2012)

Publication Date: July 15, 2012

Sold by: Digital Services LLC

Language: English

ASIN: B008LMXO14
