Textbook Of Drug Design And Discovery, Fifth Edition
Building on the success of the previous editions, the Textbook of Drug Design and Discovery, Fifth Edition, has been thoroughly revised and updated to provide a complete source of information on all facets of drug design and discovery for students of chemistry, pharmacy, pharmacology, biochemistry, and medicine. The information is presented in an up-to-date review form with an underlying and fundamental focus on the educational aspects. Beginning with an introduction to drug design and discovery, the first eight chapters cover molecular recognition, ligand-based drug design, and biostructure-based drug design. The authors also discuss drug-like properties and decision making in medicinal chemistry, chemical biology, natural products in drug discovery, and in vivo imaging in drug discovery. The middle six chapters provide an overview of peptide and protein drug design, prodrugs in drug design and development, and enzyme inhibitors. The authors also go through receptors (structure, function, and pharmacology), ion channels (structure and function), and neurotransmitter transporters (structure, function, and drug binding). The following chapters address important neurotransmitter systems, GABA and glutamic acid receptors and transporter ligands, acetylcholine, histamine, dopamine and serotonin, and opioid and cannabinoid receptors. The book concludes with an examination of neglected diseases, anticancer agents, tyrosine kinase receptors, and antibiotics.

Book Information

Hardcover: 450 pages
Publisher: CRC Press; 5 edition (August 9, 2016)
Language: English
ISBN-10: 1498702783
Product Dimensions: 1.2 x 7.2 x 10.2 inches
Shipping Weight: 2.6 pounds (View shipping rates and policies)
Average Customer Review: Be the first to review this item
Best Sellers Rank: #1,971,066 in Books (See Top 100 in Books) #96 in Medical Books > Pharmacology > Chemistry #1299 in Textbooks > Medicine & Health Sciences > Allied Health Services > Pharmacy #1558 in Textbooks > Medicine & Health Sciences > Medicine > Basic Sciences > Pharmacology
