Mosby's Nursing Drug Cards, 23e

Synopsis

Get a head start in becoming a pharmacology pro with Mosby's Nursing Drug Cards! More than 375 pre-made cards make it easy to find pharmacologic details and nursing management guidelines for over 750 generic and 600 brand-name drugs. Each durable 4 x 6-inch card lists the most up-to-date nursing information including descriptions, use(s), mechanism(s), pharmacokinetics, side/adverse effects, contraindications/precautions, interactions, dosing, and nursing management priorities. Organized alphabetically, these all-in-one cards are your portable way to drug proficiency! Coverage of over 750 generic and 600 brand-name drugs provides one-stop access to the information most needed for clinical practice. Alphabetic organization helps you find information quickly. Portable 4x6-inch cards are smaller than most drug cards and fit easily into a pocket. Consistent format features a drug's generic name, pronunciation, category, pregnancy category, brand name, dosage forms, use, action, pharmacokinetics, side/adverse effects, contraindications, interactions, dosage, and nursing management priorities. Black Box Warnings highlight high-alert drugs. Nursing management priorities follow a nursing process format: assess, diagnose, implement, and evaluate. Comprehensive index contains generic and trade names, drug classes and combination products. Tall Man lettering offers an easy, visual way to differentiate between similar drug names. Drug side effects information distinguishes between common and life-threatening side effects for drugs. Critical Thinking fill-in-the-blank card may be used on any drug prompting you to think about the drug category, action, patient teaching, and more. NANDA-I approved nursing diagnoses for all drug categories show the application of nursing diagnoses in pharmacology. Information on nutritional supplements found in the appendix includes information on both herbal and non-herbal supplements. Drug interaction information includes subheadings for drug, food, and laboratory interactions. Drug pronunciations are listed for each generic drug and drug category. Common conversion formulas are found on the inside lid of the box. Dosage calculation formulas are listed in the appendix. Blank card template lets you create additional cards.

Customer Reviews

The box was damaged upon arrival and these cards are made of flimsy paper. Overpriced card version of a drug book. Do not buy if you are looking for flash cards to learn from. This is a drug book in cheap card form.

The mosby cards are good. I am using them for my nursing degree. A classmate ordered the mediquick cards and hers had more of the medication cards than these did. But these are great size and fit well in my scrub pocket.

I am an LPN and am currently enrolled in an lpn to RN bridge program. I find drug cards to be very helpful both on the job and in clinicals at school. It allows for easy access to drug information when ever needed. I own a few sets of drugs cards but these are the set that I use. I highly recommend these for any nurse or student. I am so glad that I bought this. Well worth the money.

The "cards" are printed on pulp paper, making them absorbent of any fluids, such as blood, snot, or vomit. I used a ziplock bag to keep them dry and protected when not in use in my scrub pocket. There were also a number of medications not included in the deck, but the cards are the same size as large note cards, making it a pretty simple process of inserting your own handmade cards without having size discrepancies. The information contained on the cards is concise and effective, making it a good supplementation for making handmade cards for medication passing. The most annoying thing is that some meds have too much info, and have a second card with only a few sentences on it. I copied the info from the second card into the margin of the first, and threw the second one away.

These were a last minute buy for me. I am in my last semester of school and thought these would be helpful to study with. They have not been for me. A lot of the drugs we are covering are not in there. I could see how this would of been helpful if I bought them at the beginning of my schooling!

I bought these for my first semester of nursing school along with a drug book. These cards come in handy when I am at clinicals and do not always have time to look up a drug and can carry just the card I need instead of walking around with a book. They have a lot of the same information that is in the drug book, with the side effects, dosage, action, and nursing considerations. They have helped me out a lot!

They were very helpful in reducing my time of making drug cards for my med pass. The cards had a bit more info than I actually needed for the assignment. But they are very good drug cards and I would recommend them if you are in nursing school with small children and don't have a lot of time to stay up all night researching meds. Hope this helps!

Short and sweet on the information. They worked well for clinical. Still needed to add a post it note to personalize it to my patient, but that was easier than having to write a card from scratch.
