# Mother Earth's Beauty: Types Of Air Around Us (For Early Learners): Nature Book For Kids - Earth Sciences (Children's Weather Books)

## Synopsis

You breathe in oxygen and you breathe out carbon dioxide. But do you know that there are other types of airs around you, and each has its own functions? This amazing book breaks down the complexity of science into little parts that are easy for young children to understand and recall. Train little science achievers by getting a copy of this book today!

## Customer Reviews

This ebook is cute and is a good introduction to "Air" for kids. I do like this ebook if you can get it while it's still free. This is a book that would be good to read to your child and then you can go into more detail depending on how advanced your child is. I would have liked to see a little more detail in the book. As a few other reviewers mentioned, the part about most plants and animals taking in air, using the oxygen and then giving off carbon dioxide could be explained a little better. It could be kept very simple, here is a quote from arm.gov... "However, plants take up much more carbon dioxide in photosynthesis than they give off in respiration." There are several pages in the book that tells the different kind of natural air and artificial air (wind, breeze, fan, etc.) I think it takes up half the

book? That entire section could easily be combined into 1 or 2 pages and other information could be added or again the book could go into a little more detail. Then again, for free, it's hard to complain. Anyway, you can click "Look Inside" on the main product page and see the first few pages of the book. This is pretty much what you get.-----Here is my review for other Baby Professor ebooks in case you are in the market for an ebook in this age range. There are about 200 books in this ebook series that are offered in the Kindle store for either free or for .99. There is a variety of subjects covered (like travel, transportation, animals, etc.) and most of the books follow about the same format. They usually have a picture on one page and a short paragraph with facts about the subject, then on the next page is usually just a picture.
