"Afghanistanism" used to be a derisive term in the newspaper world. It meant playing up news from obscure far-off places while neglecting what was going wrong on your own home turf.No longer. Very few countries worldwide have been more important to the U.S. over the past quarter century than this remote, primitive, landlocked and little-understood area tucked in between Iran, Pakistan and the former U.S.S.R. In this weighty and immensely detailed book, Steve Coll, who reported from Afghanistan for the *Washington Post* (where he is now managing editor) between 1989 and 1992, sorts out for the patient reader one of the most complex diplomatic and military involvements the U.S. has experienced in this century.The cast of characters is immense, rivaling for sheer size (and personal quirkiness) any novel by Dickens or Dostoyevsky. It ranges from four U.S. Presidents

through a platoon of bemedaled generals from five or six countries and a regiment of scheming diplomats down to hard-pressed pilots, miserably ill-equipped guerilla fighters, steely-eyed assassins and suicide bombers. There are more political factions here than most readers will be able to keep track of --- not to mention the factions that spring up within factions. It is all quite dizzying, but also fascinating and important. Coll is a conscientious reporter. He does his best to keep the reader informed and to make his more important players come alive as human beings. His book is not easy reading, but it rewards well anyone who buckles down and stays with it to the end.
