Cardiovascular Pharmacology

Synopsis

The thoroughly revised, updated Third Edition of this text includes an entirely new chapter on therapy of hyperlipidemia and a wealth of new information on vasodilators, antithrombotic therapies, pharmacologic management of ischemic heart disease, and antihypertensive drugs that interact with the sympathetic nervous system and its receptors. The discussion of central neurotransmitters involved in cardiovascular regulation has been expanded, and a new chapter on modulation of neuroeffector transmission has been added. Other chapters, rewritten for this new edition, cover calcium antagonists, angiotensin-converting enzyme and renin inhibitors, antiarrhythmic drugs, and congestive heart failure.

Book Information

Hardcover: 576 pages

Publisher: Raven Pr; 3 Sub edition (September 1990)

Language: English

ISBN-10: 0881676446

ISBN-13: 978-0881676440

Product Dimensions: 1.5 x 7.5 x 10.5 inches

Shipping Weight: 3 pounds
